## EXPERIENCE

**Semilla Proyectos Internet** (06/01/2022 - 03/06/2023)

Full stack web developer

I was in charge of implementing the following functionalities:

- Connecting API services across websites.
- Turning layout design into HTML, CSS, jQuery, Bootstrap, and PHP code.
- Development of Prestashop modules.
- **Vue** and **React** development when working with many of the company's clients.

**Amvara** (14/10/2017 - 05/04/2018)

Web developer intern

My main responsibility was converting design layouts to functional web apps. I was involved in carrying out the following tasks:

- Turning Design into code using **HTML**, **CSS**, **SASS** and **Javascript**.
- Project documentation using **reStructuredText**, **Python**, **Sphinx** and **RST2PDF**.
- Visual regression testing using **Python**, **Selenium**, **Behave**, **Docker** and **ImageMagick**
